DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-20, 23, and 43, drawn to a composition.

Group II, claim(s) 21-22, drawn to a blend of first and second copolymers.

Group III, claim(s) 24-34, drawn to an ionomeric cement.

Group IV, claim(s) 35-40, drawn to a kit.

Group V, claim(s) 41-42, drawn to a polymerization system.

The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, a special technical feature which these groups share (i.e. the at least one copolymer) does not define a contribution over the prior art. For example, the claims of Groups I-V share as the special technical feature is considered

to lack novelty or an inventive step in view of the reference, US 5,369,142 as set forth in the Internal Search Report.

2. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- (1) the at least two and three (i.e. claim 5) different carboxylic acid containing monomers, inclusive of the various species and permutations of species expressed in claims 7-12 or those disclosed in the specification.
- (2) the bifunctional monomer inclusive of the species expressed in claims 14-15 or those disclosed in the specification.
- (3) the comonomer containing one or two polymerizable functional group, inclusive of the species expressed in claims 18-19 or those disclosed in the specification.
- (4) In the event that applicant elects Group II, the copolymer blend, applicant is requested to elected all the monomer species in the two copolymer, inclusive of the permutations of species set forth in claims 22 or those disclosed in the specification.

Art Unit: 1713

Applicant is required, in reply to this action, to elect a single <u>ultimate</u> species for each of the above genera (1)-(3) for prosecution on the merit to which the claims shall be restricted if no generic claim is finally held to be allowable. Where specific species are not identified in the claims, applicant is requested to elect a specific ultimate species from the specification. An alternative method of election is to identify an Example, which collectively exemplifies all the elected species. to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP \$ 809.02(a).

The following claim(s) are generic: Claims 1, 35, 41, and 42.

Art Unit: 1713

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 1713

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Helen L. Pezzuto whose telephone number is (571) 272-1108. The examiner can normally be reached on 8 AM to 4 PM, Monday thru Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Wu can be reached on (571) 272-1114. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
